

In Reception this week...

Week beginning 12/1/26

We used watercolour paint and straws to create blow-paint aliens. The children experimented with mixing different colours and changing the amount of water they added. They look brilliant on the wall near our space station! We will have a space-themed 'come and share' on Thursday 12th February from 2-3.15 pm. All Reception parents are invited to attend this session and get involved with some space related activities!

In Drawing Club we have read, '[The Way Back Home](#)'. The children produced some fantastic pictures of Martians! We had to think of a way for the boy to get back to the moon. We had lots of super rockets and even a ladder!

In phonics, we have recapped qu and s (making a z sound). We all had a fantastic go at writing sentences with these sounds in. We are still looking out for our [tricky words](#) in our reading books.

In maths, we have worked on making amounts to 5 and putting these in order. We noticed that our cube towers make a step pattern when we put them in the right order. This led us to think about one more and we looked at amounts and added one more.
