

## Last term (Y5)

A square number is found by multiplying a number by itself.

$5^2 = 5 \times 5$  and is said as "5 squared".

What is the value of  $5^2$ ?

Work out the values of the square numbers.

## Previous learning...

Write the numbers in numerals.

two million, eighty-three thousand and twelve

two million, eight hundred and three thousand and twenty

two million, eight hundred and twenty-three thousand and twelve

Write 500,000 in words.

Write the number "three and a half million" in numerals.

## We are currently learning...

Decide if each statement is true or false.

5 is a factor of both 95 and 75

3 is a common factor of 45 and 54

4 is not a common factor of 56 and 80

Write the numbers in the sorting diagram.

12 18 40 6 48 24 16 42 56 54 30

## We are learning next...

- What is a prime number?
- What is a composite number?
- How many factors does a prime number have?
- Why is 1 not a prime number?
- How can you find the prime factors of a number?
- Are the multiples of prime numbers also prime?

Which of these numbers are prime and which are composite?
